 They knew contagion didn't exist after the 1923 Lancaster Study, but we continued to push the fear narrative to keep a control on humanity.

Slide 1) The Rockefeller Takeover

Slide 2) The Lancaster Study

Slide 3) The Setup for the study

Slide 4) Questions to ask

Through this whole year they have been pushing the **fear of germs**.. just like they did in 1919, 1976, 2001, 2008, and now in 2021.

**BUT WOULDN'T IT MAKE SENSE TO
START LOOKING AT "DIS-EASE"
FROM BOTH SIDES?**

IF POISONING ONE'S BODY IS THE
ACTUAL RESULT OF GETTING SICK,
SHOULDN'T WE BE FOCUSED ON WHAT
IS GOING ON IN THE BODY AND NOT
THE WAR ON GERMS?

CULTIVATE ELEVATE

With **germ theory** they pushed that these **germs will make us sick** and **people are "contagious"** while disregarding terrain theory completely.

Yet...after an entire year of testing the theory in which the medical industry has been pushing for the last 100 years **nothing could prove that germs make us sick.**

FOR EXAMPLE IF 5 PEOPLE LIVE IN A HOME...WHY DO ONLY 2 GET SICK?

CULTIVATE ELEVATE

In the 1900s during the **Rockefeller takeover of medicine** germ theory was heavily pushed.

We were taught in school that germs make us sick and we need to DESTROY them in order to keep ourselves healthy.

These little microbes are out jumping all over the place and can "infect us". This created the constant stress that germs will get us and we need to be safe.

This fear state causes us to lower our frequency and go into a survival mode.

DURING THE 1919 KANSAS FLU PEOPLE WERE TOLD TO STAY INSIDE, WEAR MASKS, AND FEAR EVERYONE AROUND THEM. BECAUSE THE CONTAGIOUS KANSAS FLU COULD JUMP OUT AND GET THEM.

CULTIVATE ELEVATE

There were other doctors at the time that stated our **terrain** can make us sick, but they were looked at like crazies because they didn't want to go along with the single way of thinking.

BUT DOESN'T IT SEEM ODD THAT DOCTORS LIKE **LOUIS PASTUER WHO PUSHED GERM THEORY DAY AND NIGHT CONFESSED AT HIS DEATH BED THAT THE TERRAIN WAS EVERYTHING...** AND THAT GERM THEORY WAS NOT THE WAY WE SHOULD BE LOOKING AT THINGS.

CULTIVATE ELEVATE

Slide 5) Louis Pasteur and his confession

Slide 6) War on Germs is the war on humanity

The fear of microbes is used on a physical and spiritual level controlling our minds and imprinting the thought that microbes are going to take us out. But if that was the case we would be

gone long ago.

We are a product of what you eat, drink, breathe, and the terrain.

THE EXPERIMENTS INCLUDED:

They took microbes from the throat and nose of a person with the flu and put them onto those who were healthy.

None of them became sick.

They took blood from a person with the flu and injected it into others who were healthy

None of them became sick.

They took mucus from the people with the flu and injected it into the healthy people.

None of them became sick.

They took people who were sick with the flu and made them shake hands/hug the healthy people.

None of them became sick

They took people who were sick and made them cough all over the healthy people.

Yet again, none of them became sick.

THE TRUTH ON
CONTAGION

CULTIVATE ELEVATE

ABOUT A YEAR INTO THE KANSAS FLU
A STUDY CAME OUT CALLED THE THE
LANDMARK STUDY OF MILTON J.
ROSENAU, MD, "**EXPERIMENTS TO
DETERMINE MODE OF SPREAD OF
INFLUENZA**," WAS PUBLISHED IN THE
JOURNAL OF THE AMERICAN MEDICAL
ASSOCIATION IN 1919.

This study took it's patients through
a series of tests in a **quarantined
environment**.

Patients went through different
series of tests using bacteria, saliva,
bodily contact, and other forms of
possible "contagion".
